1	Need more that tutoring programs for our children/youth to succeed in graduation and going onto college and university. Ongoing support throughout... falls back to home life situations - happy home happy kidlets - can then focus on achieving and being successful at school. Life skills plays a huge part here as well - learning responsibility at a young age - cleaning, cooking, self care, self esteem. Sadly if there is alcohol, drugs (which usually involves violence) these critical tools to succeed in life do not come to be. Taking care our children and assisting our families to do this is where it begins. Many of our young people do not know who they are and where they come from (Nlaka'pamux history); need to instill those historical values at a young age and prepare them for the real world when they hit puberty... sadly many of our adults do not know or understand this either.	2/23/2017 5:54 AM
